[ICPHC 2016](#) is the premier Canadian conference and exhibition where Personalized Health Care opportunities are sourced under one roof.

[ICPHC 2016](#) is a must attend event for industry professionals:

- Attendance at the ICPHC 2016 trade show is a unique opportunity to meet key health care focused businesses, as well as federal and provincial government contacts.
- Over 1,000 specialists, 75 speakers and 50 exhibitors unite at the show for three essential days of networking, showcasing technology, and sharing expertise.
- See the latest innovations and technologies in Personalized Health Care products and services.

Opportunities for Personalized Health Care in Canada

- Canada is a world leader in biomedical research and genomics.
- Canada has a new program design for large scale applied research projects in Genomics and Personalized Health (launched in January 2012).
- Growing pressure to implement cost saving measures in the Canadian public health care system make preventative and personalized health care solutions highly attractive.
- The Canadian pharmaceutical, biotechnology and information technology in health care industry demonstrate attractive growth potential.
